Cantaloupes Have Again Moved Up

This in Wholesale Price Only, the Retail Figures Being Lower.

Despite the fact that cantaloupes have gone up wholesale, there has been a drop in their price retail. This may not last, but while it is here, consumers may have cantaloupes at 12% cents apiece. Their former price was 20 cents. Utah red curtants are also cheaper, selling at 10 cents a box. Fresh tomatoes, too, have dropped to 15 cents a pound. New potatoes are only 3 cents a pound. The fish market shows a uniform price for all kinds of salmon, that of 13 cents a pound. Striped bass has dropped from 17 to 16 cents a pound. Monday's market therefore registers a drop in prices of a few vegeta-bies, fruit and fish, with no raise.

Grain and Provisions.

Grain and Provisions.

CHICAGO, June 21.—Notwithstanding additional rain in Kausas and the Northwest, sentiment in the wheat pit was hearlish the entire sension. At the opening the July option was a shade higher to %ghte lower, at 90% to 91%.

During the first hour of trading prices held comparatively steady, the market receiving fair support from commission houses. From the start pit traders were free sellers, the diaposition seeming to be to take profits praceding the Sunday holiday. New damage reports were received, while, on the other hand, a number of advices from Kansas and Nebraska told of favorable yields.

Later, selling became general on an official prediction of bright weather tomorrow over the harvest belt. As a result the market became extremely weak. At the same time, poor demand for cash wheat in outside markets had considerable effect on prices here. For the July option the lewest point of the day was reached at 85%c, closing weak and Pagilic lower, at 20c. September was off %c, at 84%c.

Sentiment in the corn pit was bearlah.

Tainted Money

(From the Denver Daily Mining Record of Saturday, June 3rd, 1905.)

"Mr. Rockefeller had a serious time trying to give away one hundred thousand dollars. It was 'tainted,' which is very bad for money."

"Money is the scapegoat for the human family. Every r that has escaped from the mint is "tainted." If it discovered giving excursions to bacilli, it is posing as od money." Of course, it isn't the money that is to

All money is tainted.
It is tainted by the grocer who puts sand in the sugar,
gets another dark liver spot from the real estate man
to rents a house that is filled with sewer gas. It hits the chutes again when it buys a drink or a cigar

Money that is "turned over" is also tainted.

If we would find it in its purity, let us look for it at
the time of its birth—the mine.

It is purer there from the misdeeds of the humankind
than it is in other places. It is freer from the taints and
spots that characterize it in its gyrations through the
streets and towns.

And this new money gives people better thoughts. It
clevates them above the sordid; it puts them closer to nature and its ways.

Money Made From Mining Is the Cleanest Kind of Money.

The world grows richer with every dollar dug out of the ground. Mining the only method by which a man may become a millionaire without handling tainted money." It is the only means through which he may attain financial inenendence without burting his neighbor's business. No other profession or callig offers as great opportunities for money-making as does mining.

The Treadwell mine in Alaska sold for \$400 in 1881. The mine has since paid \$3,995,000 in divi-
